

# University of Pittsburgh School of Medicine

The Department of Pharmacology at the University of Pittsburgh School of Medicine is pleased to announce a name change to:

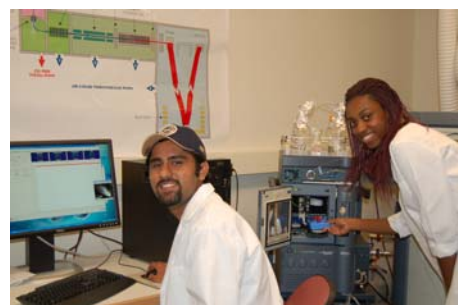

## THE DEPARTMENT OF PHARMACOLOGY & CHEMICAL BIOLOGY

This new name reflects how the research and teaching activities have evolved in the modern practice of pharmacology. Research in the department emphasizes the application of basic chemical principles to the understanding of cell signaling events, with these new insights then translated into the creation and testing of new therapeutic strategies. Areas of discovery embraced by this approach include drug development, cancer pharmacology, organ systems pharmacology, receptor function, DNA repair processes and redox signaling.

Founded in 1961, the department has about 50 primary faculty, 30 secondary faculty appointees, 30 postdoctoral fellows, 20 graduate students and 30 staff members. Research activities are supported by ~\$20 million of annual extramural funding.
